

1. Need to add a **gap** between them

Your Projects

2. Need to change the **\$** into **Rs**

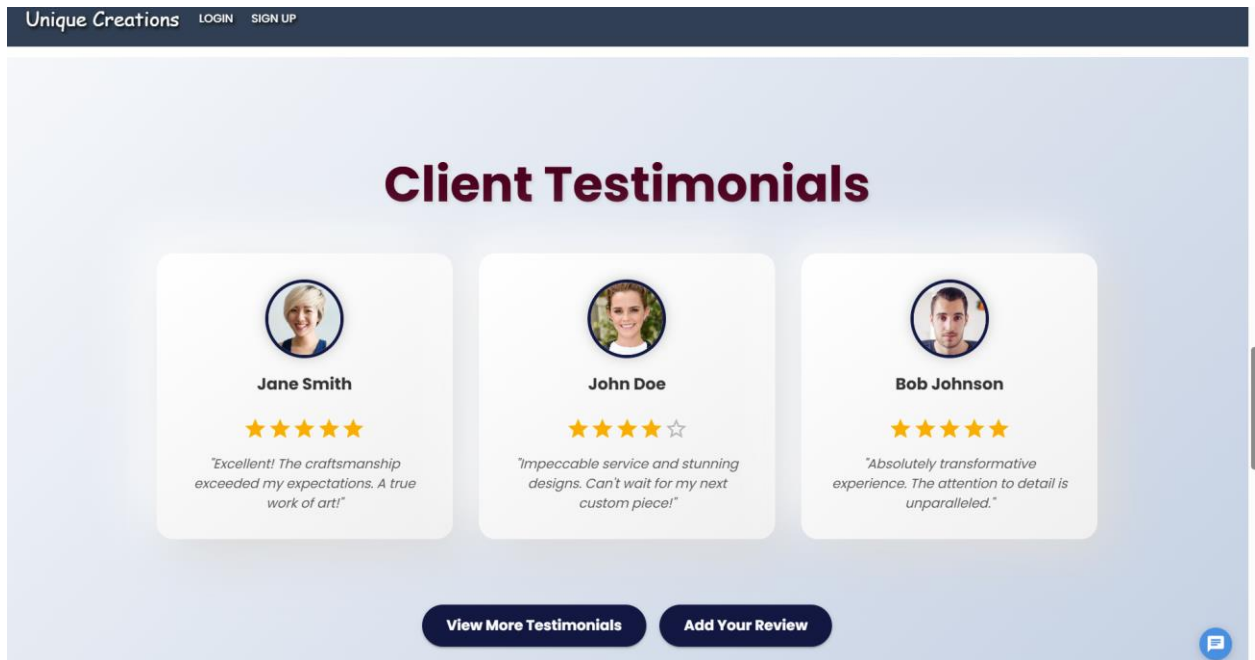

3. Must show **popup messages** for all actions.
Ex. Save Design, Newsletter subscription (Home Page)
4. Design which is added to card was **removed without checkout**.
 - Design which is card deleting without confirmation

5. Need to show **confirmation message**

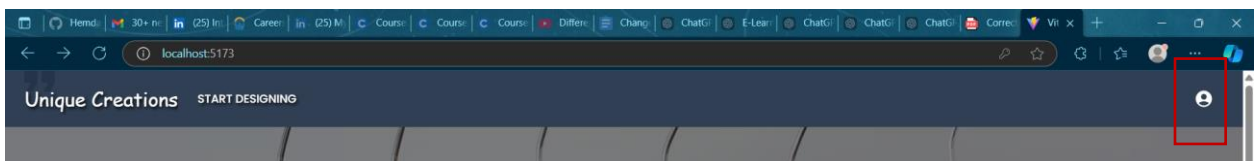

Ex. Logout.

6. Need to show the **recent reviews** in the 1st review page, retrieved from the database according to the newest reviews.

7. Remember me function & Forgot password function **isn't working**. - Login Page.

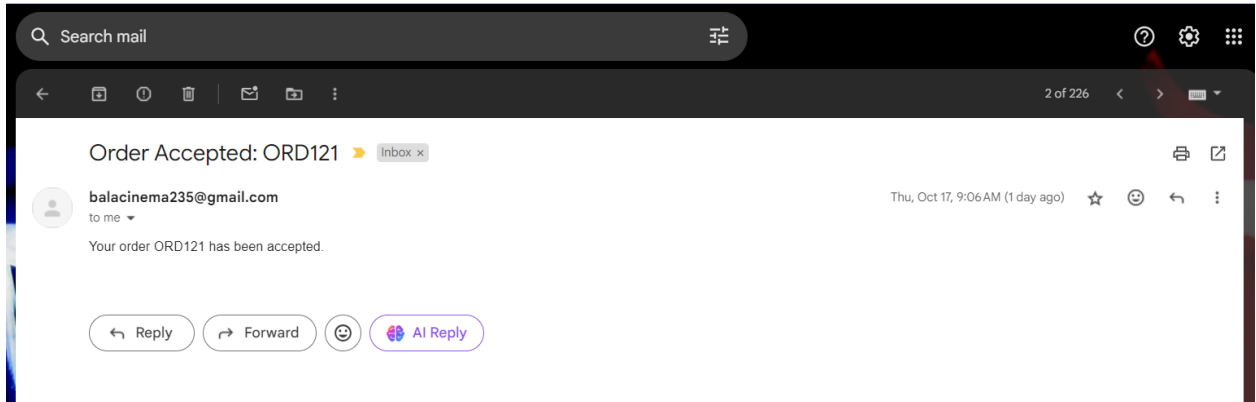

8. In the navigation bar the profile image of the user is not being retrieved.

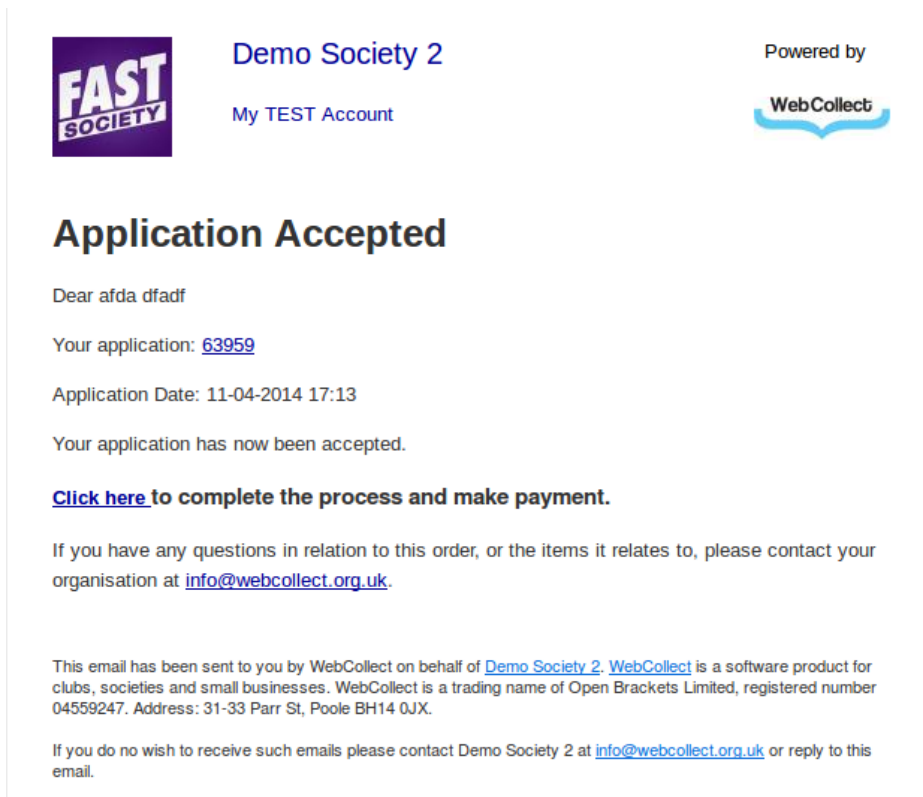

9. Currently we are having this type of mail conforming message. In this we want to change the mail address of the sender. So we have created a mail. And we have attached the mail and password along with this.

balacinema235@gmail.com → u9732895@gmail.com

u9732895@gmail.com – password – Project02

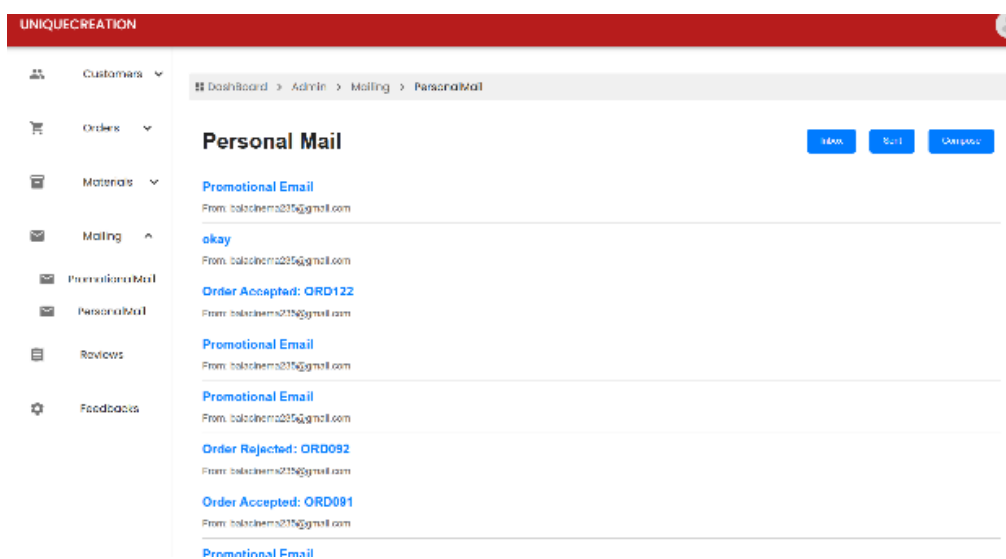

10. Also we want to get the mail for all mailing functions included in the admin panel. Like this sample below

Admin Panel

11. Filtering option is not working in Admin Dashboard

12. When sending personal email / promotion email, can't see what message we send to the customer, what time and date (mean can't see the complete details of the message which is send by the admin site and where/who is the receiver of the mail).

13. When clicking the process of the one particular person's order, it shows whole order process details. We need to show that particular order process details only.

14. When trying to delete an order from the admin panel, it is not able to delete. Instead the order stage is reversing to previous each time we try to delete the order.

When trying to delete the order it is not asking the **confirmation message** to delete.
